IMPLEMENTATION GUIDE

Connect Azure Local and SQL Server Using Dell Tools

A practical integration guide for IT administrators

What You Need

Validated Dell hardware running Azure Local

Active Azure subscription with Arc enabled

SQL Server installation media and licenses

Suneel Kumar

STEP 1

Deploy Azure Local Infrastructure

- Use Dell deployment tools to set up your cluster
- Register the cluster with your Azure tenant
- Verify node health through Windows Admin Center

Suneel Kumar

STEP 2

Enable Azure Arc Integration

Connect your Azure Local cluster to Azure Arc

Enable Azure management extensions on the nodes

Assign proper permissions for hybrid operations

Suneel Kumar

STEP 3

Install SQL Server on Azure Local

Provision virtual machines on your Azure Local cluster

Install SQL Server with best practice storage layouts

Apply Dell storage optimizations for database workloads

Suneel Kumar

STEP 4

Register SQL Server with Azure Arc

Discover SQL Server instances using Azure Arc

Enable best practices assessment for your databases

Configure automated updates and security policies

Verify It Worked

Check the Azure portal to confirm cluster registration

Verify SQL Server instances appear under Azure Arc

Ensure database performance metrics report to Azure
