IMPLEMENTATION GUIDE

Enforce NTLM signing in Windows using Group Policy

Secure your enterprise environment against NTLM attacks

What you need

- Domain Administrator credentials
- Group Policy Management Console access
- Windows Server domain environment

Suneel Kumar

STEP 1

Open Group Policy Management

Sign in to your domain controller

Open the Group Policy Management Console

Create or edit a Group Policy Object

STEP 2

Locate the NTLM security settings

Navigate to Computer Configuration

Expand Policies and Windows Settings

Select Security Settings and Local Policies

Suneel Kumar

STEP 3

Access Security Options

- Click on Security Options in the console
- Scroll down to find NTLM security policies
- Locate incoming NTLM traffic settings

Suneel Kumar

STEP 4

Configure NTLM signing requirements

- Open the network security NTLM policy
- Select require NTLMv2 session security
- Enable require strong session key

Verify it worked

- Run gpupdate /force on target servers
- Check Resultant Set of Policy report
- Confirm policy settings apply successfully
